Windows - Microsoft Office Repair Process

Last Modified on 09/11/2023 9:48 am GMT

Introduction:

• An Article outlining the process for repairing Microsoft Office to try and correct any errors appearing within any of the Office applications

Steps:

Note: Before starting Save and close all open documents that are in Word, Excel, Outlook or any other Microsoft Applications.

- 1. Open Start Menu
- 2. Type Control Panel
- 3. Click Control Panel to Open it

4. Click Programs and Features

5. Find Microsoft Office [Year] or Microsoft 365 Apps

1 Microsoft 365 Apps for enterprise - en-us	Microsoft Corporation	21/07/2022	16.0.15330.20264
A CONTRACTOR OF A CONTRACTOR OFTA CONTRACTOR O	10 A.A. 2	25 (27 (2022	400.04064.74

6. Right Click on it and Select Change

- 7. Select Either of the Repair Options and Click repair.
- 8. Allow this to complete.
- 9. Test and confirm if this issue has been resolved.

Additional Information:

• During this process if any Office applications are open the repair wizard will prompt to save and close these should you have forgotten.
